Chlorine Sanitising Tablets

Chlorine effervescent tablets for dissolving in water to prepare disinfectant solutions to kill bacteria, fungi, viruses, and spores.

Convenient, easy to use, handle and transport.

Each tablet provides 1,000 ppm available chlorine per 1 litre of water.

- Fruit & salad wash disinfectant for professional caterers.
- Terminal disinfection of food contact services & equipment including all types of liquid and confectionery vending machines.
- Effective against Coronavirus at 1000ppm*
**As the current advice from GOV.UK states, chlorine-based products can be used as disinfectants for the control of Coronavirus, at a minimum 1000ppm available chlorine, then KG7 is considered effective against Coronavirus.*
