Section 5 FIRE FIGHTING MEASURES

KG 7 Chlorine Sanitizing Tablets

Suitable extinguishing media: Use quantities of water to extinguish.

Special hazards arising from the chemical: This substance is non-flammable and can help combustion. It decomposes and produces toxic fumes in high temperature and fire.

Special protective actions for fire-fighters: Firefighters must wear air breathing apparatus, fire-fighting suits and protective gloves to extinguish in the upwind direction. Whenever possible, remove the container from the fire to open space and use spray water to cool unopened containers.

Section 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: It is recommended that emergency personnel wear protective masks and fire protective overalls. Do not touch the spill directly.

Environmental precautions: Isolate contaminated areas and restrict access.

Methods and materials for containment and cleaning up: Small amount of leakage: Avoid dusting, use a clean shovel to collect in a dry, clean, covered container and transfer to a safe place. Do not allow products to enter restricted areas such as sewers. A large amount of leakage: Cover with plastic sheeting and canvas. Use a non-sparking tool to collect the waste or transport it to a waste disposal site for disposal.

Section 7 HANDLING AND STORAGE

Precautions for safe handling: There should be sufficient local exhaust in workplace. Operators should be trained and strictly follow the operating procedures. Operators are advised to wear protective masks, normal protective clothing and rubber gloves. Operators should load and unload lightly during handling to prevent damage to the package. There should be leakage treatment equipment in workplace. There may be harmful residues in empty containers.

Conditions for safe storage, including any incompatibilities: Store in a cool, dry, well-ventilated warehouse. Keep away from fire and heat. Protect from direct sunlight. The package should be sealed and not exposed to moisture. It should be stored separately from reducers, amines, flammable materials, etc., and should not be mixed. The storage area should be provided with suitable materials to contain spills.

Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters:

Source	Material name	TWA	STEL
China Occupational Exposure Limits for Hazardous Agents in the Workplace	Sodium carbonate	3 mg/m ³	6 mg/m ³

Appropriate engineering controls: Use strictly and provide sufficient local exhaust.

Individual protection measures

Eye/face protection: Wear a protective mask.

Skin protection: Wear normal protective clothing.

Respiratory protection: A dust mask (full face mask) must be worn when exposed to dust. Air

Section 10 STABILITY AND REACTIVITY

Reactivity: /
Chemical stability: This substance is stable in normal temperature.
Possibility of hazardous reactions: Decomposes on heating. This produces toxic fumes. May explode on heating. The substance is a strong oxidant. It reacts with combustible and reducing materials. Reacts violently with ammonia, ammonium salts and amines and sodium carbonate. This generates fire and explosion hazard. Reacts with strong acids. This produces toxic gas chlorine.
Conditions to avoid: Spark, static electricity and high temperature.
Incompatible materials: Reducing agent, amines, flammable materials, etc.
Hazardous decomposition products: Oxycarbides, nitrogen oxide and chlorine hydride.
